

Deepak Varma

deepak.varma@example.com | +91 90088 99108

Principal engineer for data platforms. I have run a 14-person team and I still write code every week.

Skills

Python, SQL, Docker, Kubernetes, AWS, Kafka, Spark, Terraform

Experience

Principal Engineer | Cartly | Jan 2019 - Present

Designed the event pipeline on Kafka 3.4 that now carries 180 million events a day with a p99 delay of 2.1 seconds.

Replaced a fragile Spark 2.4 job with an incremental design; the weekly bill dropped from \$9,800 to \$3,100.

Hired and coached 14 engineers across two offices and wrote our incident review template.

Ran the move from self-managed Kubernetes 1.19 to EKS, with no customer downtime.

Senior Engineer | Dunmore Systems | Jun 2014 - Dec 2018

Built the first version of the ledger service in Python and PostgreSQL 9.6.

Wrote the SQL that detects double bookings; it found 212 cases in the first week.

Projects

Open-source load tester

Maintainer of a small Python load-testing library with about 900 stars and three regular contributors.

Education

M.S. Computer Science | 2014
