Backend engineer who builds reliable services and enjoys working with product teams.

Skills

Python, SQL, Docker, AWS, PostgreSQL, Redis, Git

Experience

Backend Engineer | Harbor Commerce | Mar 2019 - Present

Built Python services backed by PostgreSQL that process 8,000 orders a day.

Added retries and a dead-letter queue, which removed a weekly manual replay.

Containerized the services with Docker and moved them to AWS.

Software Engineer | Lumen Retail | Jul 2016 - Feb 2019

Maintained the inventory API and fixed a long-running stock count bug.

Wrote SQL reports used by the finance team every Monday.

Projects

Order Tracker

A small service that tracks order status across warehouses and sends delay alerts.

Education

B.E. Computer Science | 2016
