

Anand Pillai

anand.pillai@example.com | +91 96666 55552

Backend engineer who builds reliable services and enjoys working with product teams.

Skills

Python, SQL, Docker, AWS, PostgreSQL, Redis, Git

Experience

Backend Engineer | Slate Pay | Apr 2018 - Present

Developed Python services for card settlement that process 25,000 transactions a day.

Introduced idempotency keys so duplicate callbacks no longer double-charge customers.

Moved the services to Docker on AWS and wrote the runbooks for on-call.

Cut slow SQL reports by adding the right indexes and a nightly summary table.

Developer | Copper Mart | Jun 2015 - Mar 2018

Maintained the order API and fixed a rounding bug in tax calculation.

Wrote the SQL behind the weekly sales report.

Projects

Order Tracker

A small service that tracks order status across warehouses and sends delay alerts.

Education

B.E. Computer Science | 2016
